

## To Whom It May Concern

This letter is my personal recommendation for Mr. Muriithi James Thuranira, a Bachelor of Science in Information Technology student at KCA University, who successfully completed his two-month industrial attachment from 16/06/2025 to 18/08/2025 with the African Academy of Sciences (AAS) under my supervision.

During his attachment, James distinguished himself through his technical competence, professionalism, and dedication to learning. He was assigned to the IT Department, where he actively contributed to system enhancement, engaging in both frontend and backend development tasks. His responsibilities included:

- Upgrading Laravel 8 to 9 and resolving related compatibility issues.
- Redesigning and implementing responsive user interfaces using Blade templates, Tailwind CSS, and Figma prototypes.
- Integrating APIs to fetch and display dynamic content such as news and council membership data.
- Supporting system testing, debugging, and documentation for handover.

James demonstrated a solid grasp of Laravel, Livewire, API integration, MySQL, Redis, and UI/UX design. He also showed adaptability by configuring Linux environments and handling networking tools such as Cisco VoIP phones. Beyond technical skills, he exhibited strong soft skills in teamwork, communication, time management, and problem-solving. His ability to learn quickly, seek guidance when necessary, and deliver solutions within deadlines speaks highly of his potential in the IT industry.

I therefore recommend Mr. Muriithi James Thuranira for employment, further studies, or any opportunity that will advance his career growth.

Sincerely,  
Nicholas Kiprop

Industrial Attachment Supervisor  
African Academy of Sciences
